🔗 My portfolio

PROFILE

- Enthusiastic Computer Science student in my third year, passionate about technology and innovation. I have a solid foundation in programming, algorithms, and object-oriented programming (OOP) fundamentals, along with a keen interest in software development. Eager to delve into the digital realm, I am currently seeking a software development internship to apply and enhance my skills. Committed to continuous learning and growth, I am driven to make meaningful contributions and evolve in the software field.

JavaFX

Databases
MySQL

Git Version Control
Proficient in using Git for version control, including managing repositories, branching and merging.

Visual Studio Code | Visual Studio | IntelliJ IDEA

Microsoft Office

Computer Science
Problem-Solving and Analytical Thinking/Algorithms and Data Structures

CERTIFICATES

Front-End Developer
Certificated by Atelierele ILBAH 🔗

PROJECTS

Portfolio
Here is my portfolio website, made by me, where you can find my projects, professional details about myself and more: https://vali-s-portfolio.onrender.com/ 🔗

INTERESTS

IT — I am passionate about new technologies, both as a user and as someone who loves to learn. I consider myself a self-learner, spending time on websites like W3Schools and DataCamp. I find it fascinating how the developer community is evolving in an engaging way with platforms like daily.dev 🔗 and Medium, which make programming enjoyable while offering solutions and news in the software field that might be difficult to discover on your own., **Music** — I'm really passionate about music and enjoy a wide range of genres. I often spend time practicing guitar., **Reading** — I usually read a variety of things, but I find myself particularly interested in philosophy, cultural topics, and classic books, or anything influenced by them., **Gaming** — It's nice sometimes to relax with a good game. I usually play single-player games so I don't get consumed by competition and end up investing more time than necessary.
